SUMMARY / RECOMMENDATIONS

TECHNICIAN SIGNATURE

"The Basis Vehicle Check involves a visual inspection only of the items on the checklist and relates to the condition of the vehicle at the time of inspection. The content is used as a general guide for Automotive Solutions only and should not be relied upon by you as an assessment of the vehicle's condition. For the avoidance of doubt, this document is not a substitute for a vehicle Warrant of Fitness. The condition of your vehicle may change due to normal wear and tear or unforeseen circumstances and therefore this check does not constitute advice that the items on the checklist will be in a safe condition until your next Warrant of Fitness."
